

B1X-V BALLISTIC BATTLE BELT

B1X-V
UNDER BELT
*SOLD SEPARATELY

The PROJECT7 **BALLISTIC BATTLE BELT** w/ Velcro Liner (B1X-V) is designed to be attached to a Velcro Under Belt to provide the most secure fit during dynamic movements. Just like the B1X with neoprene liner, the B1X-V must be worn with either a P7 Duty Belt or a riggers belt threaded through it, providing additional ballistic protection (with soft armor inserts - sold separately), padding, and MOLLE locations. The B1X-V features two optional panels on the sides of each hip, allowing the belt to be passed above the MOLLE surface for holster installation or other attachments.

KEY FEATURES

Key features for **B1X-V** include:

- Additional 4" of Level IIIA ballistic protection **when soft armor inserts are used**
- Lined with hook Velcro and designed to be secured with a loop Velcro under belt to prevent the belt from riding up while sitting, running, or during dynamic movements
- External Webless MOLLE surfaces for additional equipment
- Sturdy COBRA buckle closure allows for a secure and reliable closure
- Available with duty belt or climb rated belt
- Compatible with dropleg shroud for either leg
