

### KBT IMPACT RAM

The KBT™ IMPACT RAM utilizes a proprietary blank cartridge to deliver up to 850 ft/lb of kinetic energy through the steel RAM head. The force is mechanically driven through the RAM, which creates a 2.5" breaching impact of the internal plate to defeat most doors and walls. No projectile or explosive energy leaves the device except for the force of the RAM, which resets in less than a second for multiple breaches.

The RAM is powerful enough to breach metal security screen doors, outward opening steel doors in a steel frame, or porting cinder block walls. The force of the KBT cartridge offers 850 ft./lbs. of kinetic energy through the RAM, resulting in 2.5" of hardened steel plate travel. The plate and KBT resets in less than a second for multiple breaches.

#### KBT IMPACT RAM KEY FEATURES:

- Hardened impact steel ram with 2.5" plate travel
- Delivers up to 850 ft./lbs. of force
- Breaches metal security screen doors
- Defeats outward opening steel doors in steel frame
- Capable of porting cinder block walls
- 115 dB noise report
- 28 lbs. total tool weight

### KBT CHOP

The KBT™ CHOP utilizes the same blank cartridge to deliver over 70 Ksi of cutting force through the steel teeth of the CHOP head. Using a pivoting jaw and impact-resistant, hardened teeth, the CHOP is capable of cutting up to 3/4" steel bars, locks, cables, chains, rebar, and wrought iron to gain rapid entry during high-risk operations.

The CHOP is powerful enough to cut up to 3/4" steel bars, locks, cables, chains, rebar, and wrought iron to gain rapid entry during high-risk operations. While the hardened teeth are designed to withstand hundreds of cuts, the teeth can be replaced with a single hex wrench if needed.

#### KBT CHOP KEY FEATURES:

- Integrates with all KBT breaching tools
- Delivers over 70 Ksi cutting force
- Hardened cutting teeth are designed for hundreds of cuts
- Teeth can be replaced with a single hex wrench
- Defeats steel and iron up to 3/4"
- Resets in less than a second for subsequent cuts
- 100 dB noise report
- 32 lbs. total tool weight

AARDVARK is committed to providing the highest quality and most innovative integrated products and services possible. It is AARDVARK's objective to establish long term relationships with our clients and suppliers by always conducting ourselves with honesty, integrity, and dedication to our end users.

AARDVARK produces fully Integrated Systems of mission-specific modules and industry leading equipment designed to work together to accomplish our client's mission.

AARDVARK provides innovative integration and mission support services with top of market client service from a knowledgeable staff whose primary objective is ensuring the safety and operational effectiveness of our clients.
