

# KBT SOFT CASE

The **P7 KBT SOFT CASE** was designed specifically for the Kinetic Breaching Tool. The soft case features durable nylon fabric and Kydex for rigidity, allowing for the carrying of the tool, extra cylinders, and rounds safely and securely. The soft case replaces the hard case, limiting the footprint of the system and allowing for easier storage and deployment. The reduced footprint also means more room for other equipment in a Bearcat or team vehicle.

**AVAILABLE IN BLACK ONLY**

## KEY FEATURES

Key features for **KBT Soft Case** include:
