KEY FEATURES

Key features for **UPR** include:

- Ultralight and compact design for high velocity operations, or those requiring the broadest possible range of motion
- PROJECT7's "Structured-Texture" shoulder design provides a soft, natural, and high friction shooting platform unencumbered by buckles, straps, external pads, or overlapping armor
- Patent pending Three-Piece Cummerbund (3PC) offered in three options:
 - **3PC-UL** – a non-ballistic design for minimal weight, maximal comfort, and stable load bearing surfaces, as well as operator specific sizing, broad adjustability, and rotational flexibility for unrestrained movement
 - **3PC-APS** – a soft armor cummerbund that utilizes the same 3-piece system, but includes the P7 Adaptive Pouch System. Carry any small item securely on the inside of the cummerbund without getting snagged or taking up MOLLE space on the outside.
 - **3PC-HA** – features a 6x6 hard armor plate pocket on each side of the cummerbund, increasing protection and preventing snagging. The 3PC-HA also includes the Adaptive Pouch System and is available with or without soft armor ballistics.
- SAPI based platform sizing to scale hard armor coverage to the individual operator and provide greater protection for larger operators
- THREE external wire routing channels
- FOUR internal wire routing channels
- Webless or Traditional MOLLE/PALS load bearing surfaces
- Bar tacked anchors for the installation of PROJECT7 ILB Packs and 1PS Single Point Slings
- First-Spear Tubes closure system for secure closure and rapid donning and doffing
- User replaceable cummerbund elastic
- Available in Medium, Large, and X-Large platform sizes with eight different cummerbund sizes to ensure perfect fit

UPR ULTRALIGHT PLATE RACK

SCALABILITY & CONFIGURABILITY CHART

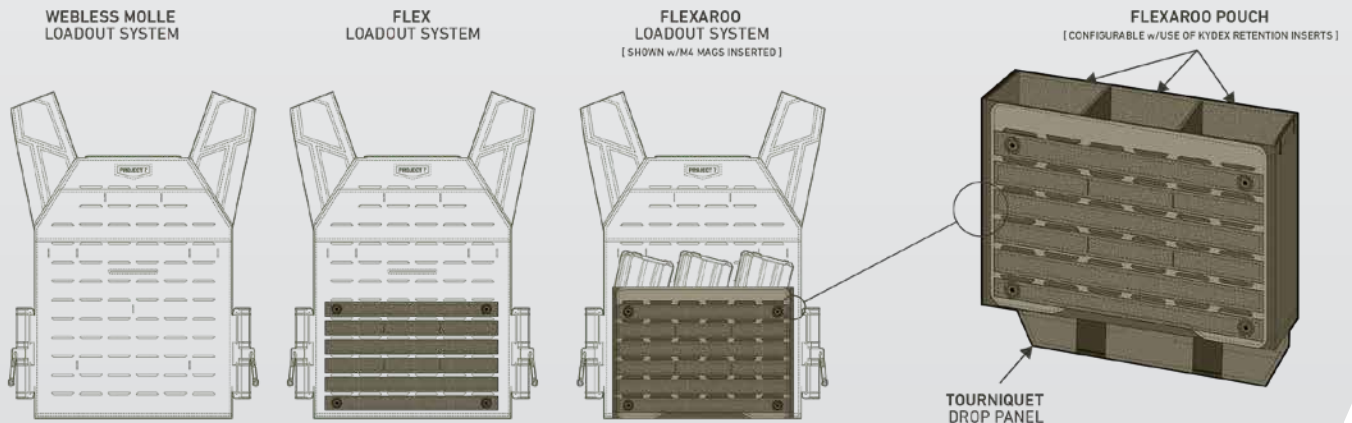

SCALABILITY refers to the ability to add optional soft ballistics to the UPR platform, "scaling" it either up or down.

Scalable features include: Cummerbund / Abdominal Protection / Spine Protection / Groin Protection

CONFIGURABILITY refers to the ability to "configure" various features of the UPR to the end-user's preference.

Configurable features include: Loadout System / In-Cummerbund Adaptive Pouch / Lining
